MUHAMMAD MUNEEB

Full Stack Developer – Fresher

"Code. Build. Learn. Repeat."

ladlamuneeb242@gmail.com • **github.com/muneeb621** • Pakistan · Open to Opportunities

PROFILE

Motivated and detail-oriented Full Stack Developer (Fresher) currently in the 2nd Year of the Diploma in Software Engineering at Aptech. Hands-on training in modern web technologies with strong skills in PHP, Laravel, JavaScript, Tailwind CSS and RESTful API development. Passionate about building scalable, user-centric web applications – from database schema to the final pixel. Quick learner, comfortable working with Git, GitHub and Postman in real project workflows.

TECHNICAL SKILLS

Backend	PHP • Laravel • RESTful APIs • MVC Architecture
Frontend	HTML5 • CSS3 • JavaScript • Tailwind CSS • Responsive UI
Database	MySQL • SQL Server • Query Design • Eloquent ORM
Tools	Git • GitHub • Postman • VS Code • npm

PROJECTS

Vaccination Management System

PHP • Laravel • MySQL • REST API

Full Backend Development

Complete system for patient records, vaccine inventory, appointment scheduling and reporting – built on Laravel with RESTful APIs consumed and tested via Postman.

Valencia Dial – E-commerce

Laravel • MySQL • Tailwind • JavaScript

Full Stack Development

Product catalog, cart system, order processing, admin dashboard and authentication with a fully responsive Tailwind CSS interface.

Laravel E-commerce

PHP • Laravel • MySQL

Learning Project

First Laravel project exploring MVC architecture, routing, Eloquent ORM and Blade templating end-to-end.
